Semester Year	Course Number	Course Title	Enrollment
Fall 2019	ECE 4984/5984	(Advanced) Linux Kernel Programming (link)	34
Spring 2019	ECE 3574	Applied Software Design (link)	53
Fall 2018	ECE 4984/5984	(Advanced) Linux Kernel Programming (link)	19
Spring 2018	ECE 3574	Applied Software Design (link)	54
Fall 2017	ECE 4984/5984	(Advanced) Linux Kernel Programming (link)	26

- *"There is not any course like this course. This is because teaching about Linux at kernel level is hard, so it is precious course to me. Even if the understanding Linux kernel is hard, the course guide and draw the overall view of the kernel. From the class, I can build the view of code in Linux kernel, so after that, I can approach the system as a code."* – in ECE 4984/5984, Fall 2019
- *"This is one of my favorite classes I've taken at VT. I can best describe it as an applied OS class - exactly the kind of thing I love to learn as a CPE major. This course is packed with content. Dr. Min did an excellent job breaking it down and bringing everything back together. There is no way I will have mastered the subject by the end of the semester because the kernel is massive. However, my understanding and ability to learn about systems is far better than it was at the beginning of the semester. That's why I rate my abilities as "good" instead of "excellent". This is a must have course for anybody wanting to get into systems."* – in ECE 4984/5984, Fall 2019
- *"Professor Min is an extremely knowledgeable and capable teacher. He has probably forgotten more about programming than I will ever know. He is also an entertaining lecturer, a fair teacher, and a good person. I wish I had more teachers like him. Also it really helps when teachers have a lot of industry experience. Relating concepts to actual things he's done is very helpful."* – in ECE 3574, Spring 2019
- *"I loved the instructor, Professor Min was very approachable and willing to help."* – in ECE 3574, Spring 2019
- *"I came to VT in search of knowledge taught by people with amazing experience and the ability to convey that information. Dr Min hits both these points wonderfully on top of juggling that with his research."* – in ECE 4984/5984, Fall 2018
- *"The lectures and presentations were well prepared and planned such that the topic was explained properly. Home works and assignments were extremely effective and let us explore the subject intensively."* – in ECE 4984/5984, Fall 2018

- *"Everything best professor I've ever had"* – in ECE 3574, Spring 2018
- *"Dr. Min is one of the best instructors I've ever had. He went over every important material in class and asked many questions during the lecture to make students to think and to participate."* – in ECE 3574, Spring 2018
- *"One of my favorite teachers in my collage career."* – in ECE 4984/5984, Fall 2017
- *"The course is fantastic and I got to learn a lot. I definitely have a better insight in linux kernel as compared to what I started off with. The projects are very interesting and your teaching style/ hints and support for the projects make the overall experience better."* – in ECE 4984/5984, Fall 2017
